21 Awards in 7 years

Ideal for all Plant and Agricultural Vehicles

All SmarTrack Stolen Vehicle Tracking devices are tested to Thatcham TQA standard. The device operates using GPS, GPRS and GSM technology. Having an inbuilt battery back-up the device has the ability to remain working even if the vehicle power supply is cut. As the device has internal aerials and motion sensor, the tracker will know if the vehicle ignition is switched on.

Subscription - Once the Subscription is purchased the device becomes fully monitored by Global Telemetrics Secure Control Centre. A Welcome Pack will be sent, which will contain your certification for your insurance. The User Manual and Emergency Contact Card will be issued at time of installation by the Engineer. The User Manual is also available online.

Monitoring - Global Telemetrics SCC monitors your vehicle's status for you 24 hours a day and 365 days of the year! A member of staff will call you if your vehicle is illegally moved (without the vehicle ignition being used) or if the battery is disconnected. If your vehicle battery runs low you will receive a text message requesting you charge your battery.

Protector Pro

- Thatcham Approved TQA208
- Monitored 24 hours a day
