

SmarTrack Thatcham Category 5 Tracking Device

Global Telemetrics is pleased to announce the latest offerings from SmarTrack are the SmarTrack CAT5 and SmarTrack P5. The devices have passed all Thatcham/SGS Category 5 and P5 testing.

The devices offer:

- 24 hour Monitoring
- Secure Online Tracking Account
- Remote Immobilisation (Police Request only)
- 2 Keyguard DRS remotes
- 3 year warranty extendable to 12 years*
- Tracking device transferable from vehicle to vehicle*
- Emergency call button

24 hour - 365 days a year monitoring. The customer will receive a call from ourselves on:

Illegal movements (vehicle being moved without the Keyguard DRS being present);

Power disconnects (vehicles main battery being disconnected).

Low Vehicle Battery Warnings a text message will be sent to the main mobile number on your account if your vehicle battery is running low.

Remote Immobilisation: in the event of the vehicle being stolen we can immobilise the vehicle from starting again once the ignition has been switched off (Police request only)

Online Tracking Account: The end-user is able to view the vehicles location and location history through a secure online tracking account. Further online features include:

Multiple Geofences a geofence is an area that you can add around your vehicle if the vehicle is then moved out of that area you will receive an email same as if you entered that area;

Changeable icons An icon of your vehicle can be changed to something close to your vehicle;

Private and Business Mileage, If the vehicle is owned by a company you can have the website only show locations between certain time scales, this will still show how many miles the vehicle has travelled.

If you require further information please call 0845 833 6971 or visit www.smartrack.eu and click on products.
