SmarTrack reaches milestone in vehicle recovery

SmarTrack Ltd was established in 2006 by a foundation team of six people who have worked together since 1996. Using time served knowledge and their expertise they developed and produced their own tracking device along with anti-false alarm soft/firmware. This dedicated team of programmers and system operators has now grown to over 20 fully trained approved SVRS staff. This team of focused people are making a large contribution in recovering stolen vehicles throughout the UK and Europe.

SmarTrack is pleased to announce that it has recovered over £5 million worth of assets for various customers over the past 5 years. Analysis of the theft statistics show that vehicles at the highest risk of being stolen are manufactured by Land Rover, BMW, Mercedes, Audi and Porsche.

SmarTrack's Stolen vehicle recovery currently stands at 110%*.
